

# CASE MIX INDEX (CMI) RESULTS FOR 2021-22

---

This note provides an overview of the CMI methodology and funding results for the 2021-22 Funding Year. **These results will be applied effective August 1, 2021.**

## CMI METHODOLOGY

The following modelling approach will continue to apply in determining CMI results:

- **Home Level CMI** or the reported CMI is calculated from your MDS 2.0 assessments completed between April 2019 – March 2020.
- **Special Rehabilitation (SR) Limited CMI** is derived by applying a 5% level limit on SR RUG group - This means that a maximum of 5% of an LTC home's assessed days will be assigned to the SR group in the calculation of the Funded CMI; the SR assessed days in excess of the 5% threshold are assigned to the next highest qualifying non-SR RUG group.
- **Funded CMI**, which is used to calculate Nursing and Personal Care (NPC) funding, is determined by applying a stability floor and a re-indexing factor to SR Limited CMI.
  - A 5% stability floor is in place to ensure that no LTC home will experience a decline of more than 5% in the Funded CMI from the previous year.
  - A re-indexing factor is applied for all homes to maintain the last year's provincial average funded CMI.

## NPC FUNDING

The FY2021-22 funding allocation is based on:

- **Using 2020-21 funded CMI for the period of April 1, 2021 to July 31, 2021 (122 days); and**
- **Using 2021-22 funded CMI for the period of August 1, 2021 to March 31, 2022 (243 days).**

## RELEASE OF CMI RESULTS

The LTC CMI funding results for all homes will be posted on the ministry website [www.hsim.health.gov.on.ca/hdbportal/](http://www.hsim.health.gov.on.ca/hdbportal/) and Ontario LTC Homes portal ([www.ltchomes.net](http://www.ltchomes.net)) which includes:

1. The LTC CMI Master Report that provides CMI results for all LTC homes.
2. The Frequently Asked Questions (FAQs) document which provides information about the CMI methodology.
